

BTX1 FM, BTX2 FM, BTNext Conference

Version 06-04-2017

By upgrading your BT unit with the new firmware version, you will have the following new features and improvements:

- General bug fix
- Improved compatibility with BMW Navigator V GPS
- Improved functionality using navigation APP on smartphone (Google Maps and Apple Maps)

Do not un-zip the file, leave it compressed.

To upload the firmware on the BT unit you need also the "BT updater" PC software.

Download the latest version of the "BTUpdater" software for PC available on line !!!

ATTENTION: **after updating** if you have a phone or other Bluetooth devices paired, you need to pair it again (otherwise the only mode available will be the "FM Radio").
